TO: Minerals File

FROM: Lynn Kunzler, Senior Reclamation Specialist *LK*

RE: Site Inspection and Meeting, Lanny Jensen, Cream Time Quarry, S/039/009, and Zachery Jensen, J&J Quarries #1, S/039/017, Sanpete County, Utah

Date of Inspection: October 30 & 31, 2001
Date of Meeting: November 2, 2001
Time of Inspection: 4:00 p.m. and 7:00 a.m.
Conditions: Cloudy, intermittent rain
Participants: Zachery Jensen, Operator; Lynn Kunzler, DOGM

Purpose of Inspection: To determine if reclamation has been completed.

Observations:

No one was at the site upon my arrival. The only equipment observed was a dozer, a drill, and a guillotine. The disturbed area has been increased to the north (less than 1 acre) since my last inspection. The regrading and ripping had been completed on about 2.36 acres on the south end of the quarry. This area was examined for evidence of seeding. No seed was observed or evidence that the area had been drill seeded.

About 1.5 miles north of this site, I met Zachery Jensen unloading rock in a new area. A newly constructed road led to the east where a new pit had been started. I informed Mr. Jensen that he needed to permit the site prior to removing any more stone, and that it may require revising the Cream Time Quarry to include this area, which may put the disturbed acreage over 5 acres (for a second time this year). Mr. Jensen indicated that he didn't think this needed to be permitted because it was on private lands. I informed him that all mining activity needed to be permitted with our office regardless of surface or mineral ownership. I also instructed Mr. Jensen that he would need to call the office and talk to management to determine when he would be able to resume operations on the new pit.

I inquired as to the status of the seeding at the original pit. Mr. Jensen informed me that they hoped to have it seeded this weekend.

Using the GPS, I surveyed the new pit and road, as well as the remaining disturbed area at the original pit. It was determined that there were 1.47 acres of disturbance at the new pit, and 4.67 acres of disturbance remaining at the original pit. A total of 8.5 acres have been disturbed between the two sites, with 2.36 acres having been regraded and 6.14 acres having no reclamation at this time.

Several photos were taken to document site conditions.

Meeting

On Friday, November 2, 2001, Lanny Jensen, Marilyn Jensen and Zachery Jensen met in the Division Office with Mary Any Wright, Wayne Hedberg and Lynn Kunzler. The purpose of this meeting was to discuss this inspection and resolve the potential non-compliance situation. Issues raised by the Jensen's included the new road which they claimed had been built in August at the request of the landowner. At that time they had no intention of quarrying stone in this area, but upon finding the stone during road construction activities, had obtained a lease from the landowner to quarry. They also claimed that Zachery had started his own business, and that the new area was in no way connected to the Cream Time Quarry (permitted with Lanny Jensen). The Division pointed out that with Zachery Jensen running both quarries, the Division had assumed that they were related. Regardless, the site needs to be permitted before any additional activity takes place at this site.

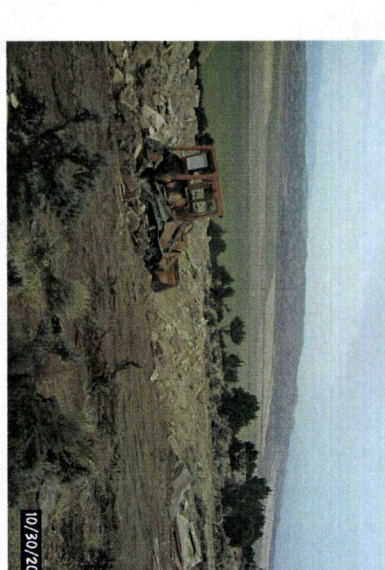

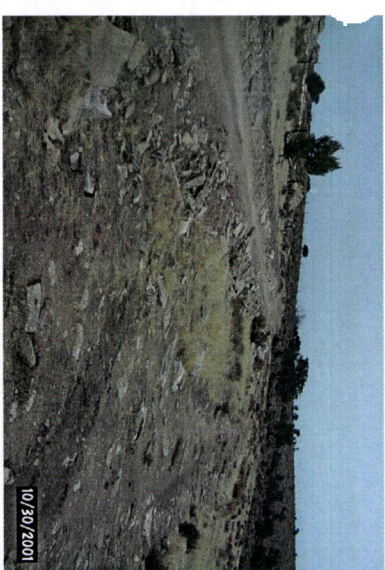

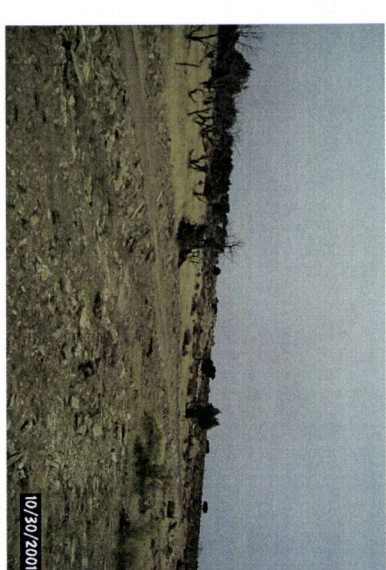

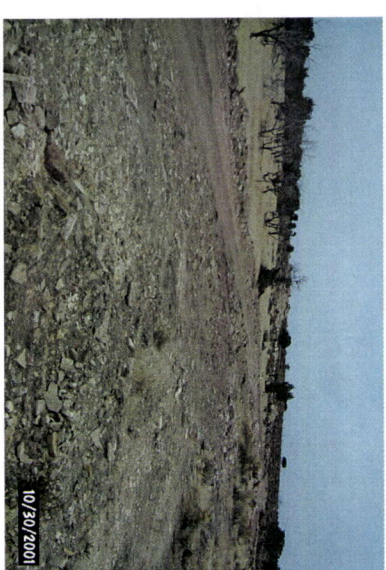

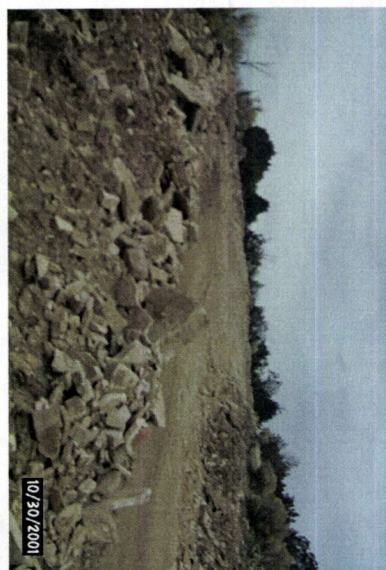

Conclusions

The Division will allow the new site to be permitted separately by Zachery Jensen (a new file number S/039/017 has been assigned to this project). A SMO form was given to Zachery Jensen to fill out and submit for his permit. He plans to fax the form to the Division on Monday (November 5) and put the hard copy in the mail. The \$100.00 permit fee was paid so that the Division can begin review of the Notice when the fax arrives, without having to wait for the hard copy to begin the review. The Division also discussed the potential need for an archaeological clearance from State History, which could take 10 days to receive.

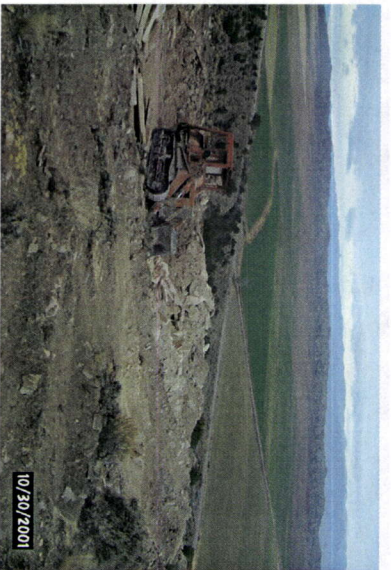

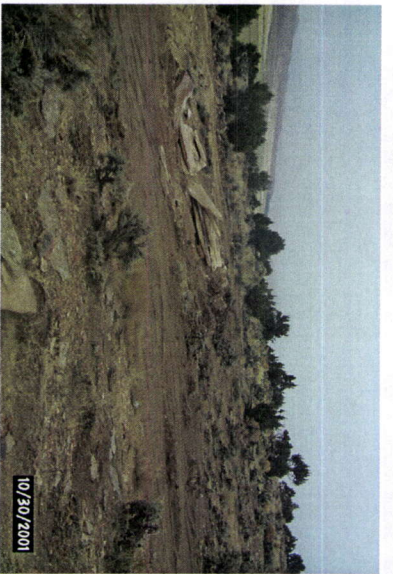

Lanny also indicated that he was having difficulty in obtaining the seed to seed the 2.36 (regraded) acres at his quarry but hoped to have this done in the next week or so.
